# OPPORTUNITIES ABOUND FOR SHARPENING YOUR SMALL BUSINESS SKILLS

Very few people begin the process of building a small business with a full knowledge of all the skills required for success. Even those who extensive experience or education in business management still need to bring themselves up to speed on the added responsibilities of entrepreneurship—tax issues, employee management, business development, accounting, etc.

Fortunately, the range of small business-oriented learning opportunities and training programs has never been broader for veteran and novice entrepreneurs alike. Seeking help is simply smart. No business owner can be adept at every aspect of operating successfully. Plus, conditions change, so keeping yourself informed is vital to long-term success.

The single most popular program in America is probably the SBA Small Business Training Network/E-Business Institute, which registers nearly a million users at its Web site each year. The Small Business Training Network is a Web-based conglomerate that can link you to

online courses, workshops, publications, learning tools, information resources and access to electronic counseling and other types of technical help. For details on the Small Business Training Network, go to [www.sba.gov](http://www.sba.gov) and click "Training" under the site's Services section.

Free online courses are offered on about 75 topics in areas such as business startup, growing your business, home-based business and re-engineering your skills. Sample titles include: Growth Strategies; Analyzing Profitability; Building Your Brand; and, Understanding Business Insurance.
